

BECOME A GLOBALLY CERTIFIED AI-READY HR LEADER SERIES

THE DEFENSIBLE AI ENTERPRISE: LEGAL, ETHICAL & GOVERNANCE SAFEGUARDS FOR HR LEADERS

AI-Positioning in the organisation | Macro-Scoping | Structural Setup | Business Re-Valuation

Corporate AI applications handle vast arrays of internal employee data. Without rigorous oversight controls, organisations face immense exposure to data protection breaches, systemic algorithmic bias, and major AI-compliance failures.

COURSE OBJECTIVES

- Act as your strict "AI-Sheriff"
- Deliver hands-on compliance frameworks for AI governance
- Provide verification procedures to validate AI systems
- Supply audit models for thorough risk assessment
- Enable the building of a highly defensible AI-enterprise risk shield

Substantial executive tenure overseeing employee data policy, corporate governance infrastructure, or regulatory compliance portfolios in AI Era.

CONTENTS

- **Neutralising "Shadow AI" Hazards:** Building corporate boundaries to stop employees from running sensitive data through unauthorised AI-platforms.
- **Algorithmic Bias Assessment:** Spotting and correcting representation imbalances and demographic skewing within AI model data pools.
- **The Talent Integrity Model:** Applying verification metrics to audit AI-bias and risk in AI-predictive personnel tools.
- **Privacy Controls & Safeguards:** Setting up end-to-end data encryption and strict user permissions across AI-training pipelines.
- **Audit Trail Architecture:** Designing immutable AI-version logs and decision records to stand up to strict compliance and regulatory AI-reviews.
