

BECOME A GLOBALLY CERTIFIED AI-READY HR LEADER SERIES DE-RISKING AI IMPLEMENTATIONS: HOW STRATEGIC HR SALVAGES VALUE AND DRIVES AI-PROJECT ROI

AI-Positioning in the organisation | Macro-Scoping | Structural Setup | Business Re-Valuation

Many enterprise AI implementations collapse mid-development – not due to technological limitations, but because they fail to meet clear business parameters, hit performance drift, or run into user adoption resistance.

COURSE OBJECTIVES

- Serve as your tactical "AI-Assassin"
- Provide financial validation frameworks for investment evaluation
- Supply operational tracking models for performance monitoring
- Protect capital investments from unnecessary losses
- Kill low-yield (Manual) initiatives before they drain corporate budgets

Substantial executive experience tracking investment budgets,
defining portfolio performance metrics, or leading cross-departmental operations.

CONTENTS

- **Boardroom Business Case Modeling on AI Initiatives:** Setting clear financial metrics, cost baselines, and Total Cost of Ownership parameters.
- **Phase-Specific Gate Management:** Building strict Go/No-Go verification thresholds to evaluate AI-model readiness before live deployment.
- **Defeating Adoption Resistance on AI:** Deploying systematic AI-change frameworks to clear user anxiety and build core psychological trust.
- **Drift Management & Dashboard Alerts:** Designing performance tracking systems to spot AI model decay and deploy rapid rollback protocols.
- **Operational Continuity Engineering:** Building enterprise disaster-recovery procedures and backup response workflows for AI initiatives.
