HKIHRM

Units 1810-15, 18/F, Millennium City 2,
378 Kwun Tong Road, Kwun Tong, Kowloon
(3-minute walk from Ngau Tau Kok MTR station exit A)

A workplace injury can quickly become more than a compensation issue. Without proper management, it may lead to prolonged absence, escalating costs, employee disengagement, workplace disputes, and operational disruption.

Why Attend?

By joining this workshop, you will learn how to:

- Understand the psychosocial journey of injured employees and recovery factors
- Identify barriers that delay return-to-work success
- Communicate with empathy during sensitive situations
- Manage complex, long-duration injury cases confidently
- Develop return-to-work plans balancing people and business needs
- Build a structured work injury management system
- Use AI and data analytics for smarter case decisions
- Reduce re-injury risk and ensure sustainable reintegration

Key Topics:

- Psychosocial stages of work injury (bio-psychosocial model)
- Return-to-work barriers and influencing factors
- Empathetic communication with injured employees
- Managing complex, long-duration cases
- Building work injury systems and return-to-work plans
- AI and data analytics in case management
- Preventing re-injury and ensuring sustainable return
